

# Viswa Yadeedy Chatla

Full-Stack Developer

+1 (989) 854 2454 | viswayadeedy.ch@gmail.com | [LinkedIn](#) | [Portfolio](#)

## SUMMARY

Full-stack software engineer with 4+ years of experience building production systems in fintech and enterprise logistics. Built and **shipped end-to-end onboarding, authentication, and payment workflows across React dashboards and backend services**, reducing onboarding turnaround by ~30% and enabling compliant Stripe-based payment activation for verified merchants and nonprofits. Experienced delivering **secure, role-aware user flows** backed by **Spring Boot APIs, OAuth/JWT authentication**, and **AWS-hosted services**.

## SKILLS

**Frontend Engineering** React, Angular, JavaScript (ES6+), TypeScript, HTML, CSS, Component-Based Architecture, Client-Side State Management, Async UI Workflows, Form Validation, Accessibility (ARIA, semantic HTML), Figma-to-UI implementation

**Backend Engineering & APIs** Java, Spring Boot, Python, FastAPI, REST API design, API integration, Authentication & Authorization (OAuth, JWT), Stripe Connect, Stripe Identity, server-side validation

**Databases** SQL, MongoDB, relational & NoSQL data modeling

**Cloud Platforms & Infrastructure** AWS (S3, RDS, Lambda, API Gateway, Elastic Beanstalk), environment configuration, secure cloud access

**AI-Enabled Development** LangChain, LangGraph, vector databases

## EXPERIENCE

**Software Engineer** June 2025 - Present  
Impartial

- Implemented backend APIs for **multi-actor onboarding** (users, merchants, nonprofits, admins), centralizing verification states, approvals, and payment readiness into one system, **reducing onboarding time by 30%** and cutting manual review work for ops.
- Integrated **Stripe Connect and Stripe Identity** to activate payments for verified merchants and nonprofits, handling compliant account setup and delegating payment processing to Stripe-managed flows.
- Designed role-based **authentication and authorization using OAuth** (Google and Apple sign-in) and JWT-secured APIs, enforcing **least-privilege access to sensitive production data** across admin, merchant, nonprofit, and user roles.
- Collaborated with a small team of engineers to build and ship **full-stack features** for **merchant and admin dashboards**, owning **React UI development, backend API integration**, and end-to-end workflow reliability.
- Implemented **React dashboards** with **client-side state management** to handle **async API workflows, partial submissions**, and **error states**, ensuring reliable user flows during onboarding and review processes.

**Software Engineer** Dec 2019 - July 2023  
Imaginnovate

- Led **frontend modernization** of internal logistics systems, migrating legacy JavaScript UIs to a component-based Angular architecture and translating Figma designs into **reusable, responsive interfaces** used daily by **hundreds of internal operations and support users**.
- Simplified order creation and load management workflows** by redesigning frontend user flows, reducing unnecessary redirects and UI friction in high-usage internal tools.
- Improved reliability of complex frontend workflows by fixing **UI-level bugs, refining form validation**, and standardizing navigation behavior across order and load management screens.
- Strengthened backend stability** by upgrading deprecated dependencies, **resolving critical CVEs**, and **updating affected business logic and tests** to maintain **compatibility and secure operation**.
- Collaborated with **backend engineers, designers, and QA** to debug **production issues, validate fixes** across frontend and backend layers, and support smooth releases in a **large enterprise environment**.

## PROJECTS

**NextRoleAI: AI Job Market Intelligence Platform**

Tech: React | FastAPI | LangGraph | LangChain | OpenAI API | Tavily

- Built a **frontend-driven AI platform** that automates job market research by **searching, parsing, and analyzing live job postings**, reducing manual analysis effort by **90%+**.
- Designed and implemented a **React dashboard** to surface **structured insights** such as trending skills, role demand, and hiring patterns, optimized for **clarity, usability, and fast information consumption**.
- Developed a **FastAPI backend** to coordinate **search, analysis, and aggregation workflows**, exposing **clean APIs** consumed by the frontend.
- Integrated **Tavily search** and **LLM-based analysis** to transform **unstructured job data** into actionable, user-friendly insights delivered through **consistent UI formats**.

**AI Video Content Assistant: Frontend-Driven AI Tool**

- Built a full-stack web app that generates **multi-format outputs** (TLDR, detailed summary, Q&A) from YouTube links, delivering structured insights users can reuse immediately.
- Designed and implemented a **React UI** for batch processing, history, and export actions (copy, share, Notion export), prioritizing clear information hierarchy and fast consumption.
- Developed a **FastAPI backend** to orchestrate transcript ingestion, prompt execution, and response formatting, returning consistent, frontend-friendly JSON outputs.
- Integrated **OpenAI API** to transform transcripts into summaries and Q&A, adding output templates and guardrails for predictable results across different video types.
- Implemented **Stripe-based subscriptions** to gate premium features (batch runs, exports), connecting checkout state to application access rules end to end.

**PuzzlePulse | AWS Lambda, DynamoDB, Java, Spring Boot, CI/CD**

- Engineered serverless backend logic using **AWS Lambda, API Gateway, and DynamoDB** to handle real-time query submissions and user interactions, reducing server costs by **40%**.
- Built scalable backend services in **Java and Spring Boot** to support multi-format content uploads and real-time Q&A workflows across web platforms.
- Implemented **CI/CD pipelines** with **AWS CodePipeline and CloudFormation**, automating deployments and infrastructure provisioning to cut release time by **60%** and improve deployment reliability.

## EDUCATION

**MS - Information Systems** (3.83 GPA)  
Central Michigan University

Aug 2023 - May 2025
